Functionality Improvements, Specification Changes, and Library Updates

FinalCode BrowserView

- Updated the version of PDF.js used for file viewing in the browser.

Known Issues Fixed in This Release

This release addresses the following issues:

FinalCode Client

- - **Issue:** There was a problem where files could not be decrypted in environments where "¥¥" was included not at the beginning of the file path.

    Fix: The issue was fixed so that files can be decrypted in environments where "¥¥" is included not at the beginning of the file path.

- - **Issue:** There was a problem where the system would hang when printing encrypted files from Notepad using certain printers.

    Fix: The issue was fixed to prevent hanging when printing from Notepad.

- - **Issue:** Capture control and screen watermark control were not functioning in the [Overview] window of eDrawings.

    Fix: The issue was fixed so that capture control and screen watermark control function in the [Overview] window of eDrawings.

- - **Issue:** There were text boxes in eDrawings where copy & paste within the same file was not possible when copy & paste and capture control were enabled.

    Fix: The issue was fixed to allow copy & paste within the same file in eDrawings when

copy & paste and capture control are enabled.

- **- Issue:** The eDrawings window could not be fixed in place when moved if copy & paste and capture control were enabled.

   Fix: The issue was fixed to allow the eDrawings window to be fixed in place when moved if copy & paste and capture control are enabled.

- **- Issue:** Under certain conditions, the parent folder of encrypted files could be locked, preventing renaming and other actions.

   Fix: The issue was fixed to prevent the parent folder of encrypted files from being locked.
